To Whom It May Concern:

Paul Welch designed and oversaw the installation of our geothermal unit at the Hampton Veterinary Hospital. I was impressed by his professionalism, commitment to excellence and approachability.

During construction of the system, Mr. Welch was available to answer any questions that I had. He provided an accurate estimation of the cost and tailored the construction to meet the needs of a very busy animal hospital making our downtime minimal. He informed me of what to expect and helped us maintain our work schedule.

The system has been in place for over 2 years and has run smoothly and efficiently. I can see the impact it has made on our energy usage and the system has not malfunctioned once.

Since completing the project, Mr. Welch has continued to be available for follow up questions and assistance. He responds rapidly to any question or request I have had, even if it involved reprinting old invoices. Due to his exemplary work ethic, I have employed his services since the installation of the geothermal unit to evaluate and maintain the solar systems on both the hospital and my house.

I can recommend Mr. Welch with no reservations at all. I am confident he would apply the same personal integrity to any project he undertakes.

Sincerely,

Karen Johnston
Karen Johnston, DVM
